

RUICHUN MA

ruichun.ma@yale.edu

<https://rui-chun.github.io/>

EDUCATION

Yale University

September 2020 - 2024 (Expected)

Research Interests: Wireless networking, Network systems, IoT

Ph.D. student in Electrical Engineering (CE track)

Advisor: Prof. Wenjun Hu

University of Science and Technology of China

September 2016 - July 2020

School of the Gifted Young (Rank:1/28)

Bachelor of Engineering in EE & AI

RESEARCH EXPERIENCE

Bridging Heterogeneous Wireless Networks with Metasurfaces

Sep 2020 - Now

Research @ Yale

Advisor: Prof. Wenjun Hu

- Designed metasurface systems as a cross-layer tool to support heterogeneous wireless networks
- Built prototypes to enhance wireless/IoT links through beamforming and impedance matching
- Related research works are published in MobiCom'24, MobiCom'23 and HotNets'21

mmWave sensing for AR/VR

May - Aug 2024

Research Internship @ Meta Reality Lab

- (In-coming summer intern)

Metasurfaces for Next-gen Networks

Jan - Aug 2023

Research Internship @ Microsoft Research Asia

Advisor: Prof. Lili Qiu

- Designed several metasurfaces for mmWave coverage and wireless sensing projects
- Developed an automated service framework for metasurface-aided mmWave coverage (MobiCom'24)
- Built a mmWave testbed with 802.11ad routers and a ROS robot
- Demonstrated metasurface-based wireless glucose sensing to Mr. Bill Gates

Wireless Mesh Network Protocol Design

Jul - Oct 2019

Research Internship @ UIUC

Advisor: Prof. Haitham Hassanieh

- Built a mesh network testbed with Raspberry Pi nodes by modifying the 802.11n driver
- Improved the spatial reuse of mesh networks with preamble detection and concurrent transmission
- Reduced the average packet delay by 30% under NS3 simulation of 802.11ax networks

Meta-RL Based Bitrate Adaptation Model

Apr - Jun 2019

Undergrad Research @ USTC

Advisor: Prof. Hancheng Lu

- Applied meta-reinforcement learning method to bitrate adaptation for video streaming
- Implemented a meta-RL model based on Model-Agnostic Meta-Learning framework
- Achieved fast learning for different QoS metrics of rate adaptation

Wireless Backscatter Tracking System

Mar - Oct 2018

Undergrad Research @ USTC

Advisor: Prof. Panlong Yang

- Developed a hand-writing tracking system based on a wireless backscatter tag
- Achieved millimeter-level tracking accuracy and led to a UbiComp'19 paper

TECHNICAL SKILLS

Programming	C (embedded programming), C++ , MATLAB, Python, Rust, Go
Tools	HFSS (RF design and simulation), Altium (PCB design), PyTorch (ML)
	SDR (Software Defined Radios), ROS (Robot Operating System)

TEACHING EXPERIENCE

Neural Networks and Learning Systems
Digital Signals and Systems

Teaching Assistant, 2021 Fall @ Yale
Teaching Assistant, 2019 Fall @ USTC

SERVICE

Technical program committee member:
Artifact evaluation committee member:

ACM S3 workshop 2023
MobiCom'24

HONORS AND AWARDS

EE Honor Program (top 10%)	2016-2020
Merit Student Scholarship (top 5%)	2017-2020
Outstanding Cadres of Students Union	2017

PROJECTS

OLSRv2 Protocol Implementation on IoT devices

March 2021 - May 2021

Course project of Topics in Networked Systems @ Yale

- Implemented OLSRv2(RFC7181) for mobile ad-hoc networks based on FreeRTOS with C
- Deployed and tested the implementation on resource-constrained ESP32 embedded devices
- Received Honor grade (highest) from the course instructor, Prof. Y. Richard Yang

Medical Robotic Project

August 2018

Summer school project @ Imperial College London

- Developed an auxiliary robot arm prototype for surgery
- Designed a control system based on voice recognition and image processing
- Led the team and received Runner-up Award
